IMPORTANT FEATURES

- Dependable summer forage
- Drought tolerant
- Quality horse feed – low prussic acid risk
- Best for grazing/pasture

Principal Uses

HAY: ................................................................. 3
HAYLAGE: .......................................................... 4
GRAZING/PASTURE: ........................................... 2
GREENCHOP: ..................................................... 4

DISEASE RESISTANCE

MDMV TOLERANCE ....................... Undetermined

DOWNY MILDEW:
- Pathotype 1 .............................. Resistant
- Pathotype 3 .............................. Undetermined
- Pathotype 6 .............................. Undetermined

ANTHRACNOSE .......................... Undetermined

HEAD SMUT .............................................. N/A

INSECT RESISTANCE

GREENBUG:
- Biotype I .............................. Resistant
- Biotype C .............................. Resistant
- Biotype E .............................. Resistant

AGRONOMIC TRAITS

FORAGE YIELD POTENTIAL ...................... 4
EARLY GROWTH RATE .................................. 5
REGROWTH .................................................. 3
AVG. PLANT HEIGHT .......................... 5’ – 7’
STANDABILITY ......................................... 3
DROUGHT TOLERANCE .............................. 1
LEAFINESS .................................................. 1
PRUSSIC ACID POTENTIAL ....................... None
AVG. SEEDS/LB(X1000) ......................... 47

PLANTING RATE GUIDE (LBS./ACRE)

¹Recommended rates for cover crop
²Includes high rainfall areas and conditions. Planting rates for hybrid sudangrass and sorghum x sudangrass depends on a number of factors including location, growing conditions, management, etc. The above rates serve as a guide.

Footnote: 1 - Numerical Rating: 1 to 9 (1 = Excellent, 5 = Average, 9 = Poor)
