

251

251 fits well in the early sorghum areas of the High Plains. It works very well as a double crop sorghum or for late planting in southern-sorghum areas. Excellent drought tolerance allows for planting in the more arid areas where rainfall is less predictable.

Key Advantages

- Very early grain sorghum
- Excellent standability
- Excellent drought tolerance
- Early planting for double-crop
- Red grain, weathers well
- Late planting or double-crop
- Optimal yields in narrow rows

Agronomic Traits

Scale: 1=Excellent 3=Good 5=Average 7=Low 9=Poor

Yield for Maturity.....	3
